

# "OH, I see"

## HOW TO EDIT

### Organization

Have you intentionally set down an organizational strategy that matches your content, such as presenting information chronologically or thematically? Do you effectively use transitions to move your reader through your writing? Have you chosen a sensible order for your sentences and paragraphs?

### Ideas

Are your ideas fully developed? Do you address the requirements of the assignment? Does everything you write have a purpose? Do you include the details and examples that make your writing meaningful, informative and convincing? Is your content creative, original and a reflection of who you are as a writer?

### Clarity

Do you clearly present your perspective? Do your sentences flow smoothly? When you read your writing aloud does it sound as good as when you read it to yourself? Are you careful about your word choice so as to avoid confusion?
